

## **CT Rare Disease Day**

February 22, 2018 at 8:00 AM EST

The Rallybio team will be attending the 2018 Connecticut Rare Disease Day Advocacy Event in Hartford on Wednesday, February 28th.

The purpose of this event is to raise awareness here in Connecticut for the 1 in 10 individuals living with a rare disease and the challenges they face. Many important decisions related to rare diseases are made at our state level, and the implementation of the Affordable Care Act has highlighted the increasingly important role of state policies and programs in assuring that the healthcare needs of the American public are addressed.

Educating state legislators and their staff members is extremely important and we look forward to participating.
